

► MCS - abbreviazione di "MINI CONTROL SYSTEM" definisce una gamma completa di raccordi miniaturizzati per oleodinamica, miniprese di pressione e relativi accessori. MCS offre un sistema semplice ed economico per il controllo delle pressioni nei sistemi idraulici, grazie al quale è possibile eliminare l'impiego di manometri fissi ed esclusori montati permanentemente sul sistema, riducendo così sia i costi iniziali che quelli per la sostituzione dei manometri danneggiati da anomalie del sistema o da agenti esterni.

► E' possibile installare le miniprese MCS in qualsiasi punto del sistema idraulico in cui occorre monitorare la pressione e, in caso di postazioni lontane o difficili da raggiungere, una minipresa MCS passaparete e un miniflessibile MCS consentono di portare la pressione ad un pannello centrale facilitandone il controllo. Il miniflessibile è così piccolo e flessibile da poter essere installato come un normale cavo elettrico.

► Un altro vantaggio di MCS è quello di poter controllare la pressione mentre il sistema idraulico è a pieno regime; i raccordi e il miniflessibile

tollerano una pressione massima di lavoro di 630bar. Grazie al loro design, è possibile unire la minipresa al miniflessibile avvilandoli insieme semplicemente con due dita, senza dover utilizzare strumenti particolari e senza rischio di trafilamenti mentre il sistema idraulico è in funzione; la connessione fa tenuta automaticamente e non si allenta in seguito a vibrazioni o picchi di pressione.

► MCS offre inoltre svariati tipi di terminali in grado di adattarsi alle miniprese di altri costruttori; possono

servire anche per ottenere dei campioni di fluido da diversi punti del sistema idraulico oppure per spurgare il sistema oleodinamico dall'aria.

► Il "MINI CONTROL SYSTEM" è talmente versatile da essere utilizzato al posto dei tubi rigidi per collegamento manometri, pressostati, trasduttori di pressione, linee di pilotaggio ecc. Attutisce i picchi di pressione e grazie all'effetto capillare del miniflessibile impedisce che le vibrazioni raggiungano gli strumenti.

MCS[®]
Mini Control System

► MCS - short for mini control system - defines a complete range of miniature fittings, check couplings and accessories. MCS offers a simple, inexpensive means to check pressure in hydraulic systems. Permanently mounted pressure gauges and shut-off valves are no more necessary, thereby reducing initial costs. Replacement costs due to gauges broken by system problems or external damages are also eliminated.

► MCS check couplings can be installed at any point of the hydraulic system where pressure is to be monitored. For remote or hard-to-reach locations, an MCS bulkhead coupling and an MCS micro-bore hose bring pressure to a central panel thus simplifying its control. The micro-bore hose is so small and flexible that it can be installed like electrical wiring.

► Pressure can be checked while hydraulic systems are at full pressure. Micro test fittings and micro-bore hoses can bear a max. working pressure of 630 bar. Thanks to their design, both the connector and the micro hose coupling can be joined under pressure by screwing the coupling with two fingers without any tools and any leakage; the connection is self-sealing and will not loosen under vibration or pressure peaks.

► MCS offers optional hose ends to adapt to many other test couplings from other suppliers. Besides, they can be used for obtaining fluid samples from various points in hydraulic systems or as an air bleed device.

► The "Mini Control System" is versatile enough to be used instead of rigid pipes for pressure gauges, pressure

switches, pressure transducers, pilot lines, etc.

It dampens pressure peaks and prevents vibration from reaching the instruments, thanks to the micro hose's capillary effect.

ISO 9001:2000 Cert. n° 0445/2

Dati tecnici

Norma di riferimento: ISO 15171-2 08/2000
Pressione di lavoro: 630 bar max.
Pressione di scoppio: >2520 bar

► Applicazioni

- Controllo pressione in circuiti idraulici
- Lubrificazione
- Spurgo aria
- Prelievo campioni olio
- Microidraulica

► Fluidi

- Olii idraulici e olii a base minerale
- Compatibilità con altri fluidi a richiesta

► Materiale

- Corpo minipresa e cappuccio in Acciaio Trafil. 9SMnPb28K
- Guarnizione anti vibrazione in BUNA N. (opzionale)
- Acciaio inox AISI 316 - DIN 14436: su richiesta

Temperatura di impiego:

► con cappuccio di metallo

- con guarnizione in BUNA N.: -30°C a +120°C
- con guarnizione in VITON: -20°C a +200°C

► con cappuccio in plastica

- -30°C a +100°C

► Trattamento di finitura:

- Esente da Cromo VI

Technical data

Reference norm: ISO 15171-2 08/2000
Working pressure: 630 bar max.
Burst pressure: >2520 bar

► Applications

- Pressure check in hydraulic systems
- Lubrication
- Air bleeding
- Oil samples drawing
- Microhydraulics

► Fluids

- Hydraulic oils and mineral-based oils
- Compatibility with other fluids: on request

► Materials

- Test point's body and cap made of steel 9SMnPb28K
- Anti-vibration sealing made of BUNA N. (optional)
- Stainless steel AISI 316 - DIN 14436: on request

Working temperature:

► with steel cap

- with sealing in BUNA N.: -30°C a +120°C
- with sealing in VITON: -20°C a +200°C

► with plastic cap

- -30°C a +100°C

► Finish treatment:

- Chrome VI free

Opzioni Options

► Tipo VITON

EPDM

Senza cappuccio

Con O'ring antivibrante

- Minipresa con guarnizioni in VITON aggiungere: **.V**
- Minipresa con guarnizioni in EPDM aggiungere: **.EA**
- Minipresa senza cappuccio sostituire l'ultima cifra con **2**
- Minipresa con cappuccio di metallo ed O'ring antivibrante sostituire l'ultima cifra con **3**

► Esempio

620.01.204.21.V

620.01.204.21.EA

620.01.204.22

620.01.204.23

► Type VITON

EPDM

Without cap

With antivibration
O'ring

- For test point with VITON sealings add: **.V**
- For test point with EPDM sealings add: **.EA**
- For test point without cap replace the last number with **2**
- For test point with metal cap and antivibration O'ring replace the last number with **3**

► Example

620.01.204.21.V

620.01.204.21.EA

620.01.204.22

620.01.204.23

Caratteristiche tecniche

Pressione d'esercizio:	Stabile: 75% del valore di fondoscala
Temperatura d'utilizzo:	Ambiente: -25°C a 65°C
Sovrapressione:	25% ≤ 100 bar ; 15% > 100 bar
Costruzione:	cassa in acciaio inox riempita di glicerina con valvola di sfiato
Fascia bordata:	in acciaio inox AISI 304
Flangia di fissaggio:	in acciaio inox AISI 304 con tre fori
Quadrante:	in alluminio a sfondo bianco, con graduazione e numerazione in nero e rosso Marchio MCS in verde
Indice:	in alluminio laccato nero
Vetro:	in policarbonato trasparente
Attacco:	in ottone per pressioni da 0 a 600 bar con strozzatura interna da 0,8 mm
Molla tubolare:	- in bronzo fosforoso con saldature dolci per pressioni fino a 600 bar - in acciaio al Cr-Ni con saldature forti per pressioni da 600 a 1000 bar
Dimensioni nominali e tipi di montaggio:	a norme EN 837
Precisione di misura a 20°C:	- ± 1,6% v.f.s. per manometri ø 63 UNI 8293 e DIN 16005 - ± 1% v.f.s. per manometri ø100 UNI 8293 e DIN 16005
Grado di protezione:	IP 65 secondo EN 837
Graduazione e numerazione:	secondo EN 837

Technical data

Working pressure:	Steady: 75% of full scale value
Working temperature range:	Ambient: -25°C to 65°C / -40°F to 150°F
Overpressure:	25% ≤ 100 bar ; 15% > 100 bar
Casing body:	glycerine filled in stainless steel case with safety vent.
Band ring:	stainless steel AISI 304
Fixing flange:	stainless steel AISI 304 with 3 holes
Dial:	white painted aluminium with indelible black and red graduation MCS green mark
Needle:	black painted aluminium
Transparent cover:	polycarbonat
Connection:	brass for pressure up to 600 bar
Tubular spring:	in phosphor bronze for pressure up to 600 bar Cr-Ni steel for pressure up to 1000 bar
Dimensions and assembly:	according to EN 837
Accuracy with temperature 20°C:	+/- 1,6% referred to full scale value ø 63 UNI 8293 and DIN 16005 +/- 1% referred to full scale value ø 100 UNI 8293 and DIN 16005
Protection class:	IP 65 according to EN 837
Range and graduation:	according to EN 837

Valigetta in metallo per controllo pressioni

Metal test box for pressure check

- ▶ Costruzione in lamiera d'acciaio
- ▶ Verniciatura a forno resistente agli urti
- ▶ Coperchio sfilabile comprendente manometri a bagno di glicerina
- ▶ Vano per microtubi protetto da coperchio in lamiera d'acciaio
- ▶ Serie di microtubi lunghezza 2000 mm
- ▶ Dimensioni: 420 x 110 x 310 mm
- ▶ Construction: sheet-steel
- ▶ Shock resistant oven-baked painting
- ▶ Removable cover comprising glycerine-filled pressure gauges
- ▶ Box for micro-hoses protected by a sheet-steel cover
- ▶ 1 set of micro-hoses with length 2000 mm
- ▶ Dimensions: 420 x 110 x 310 mm
